DURING AN INSPECTION AND/OR EVALUATION OF YOUR Proposed Food Establishment

THE FOLLOWING CONDITIONS WERE OBSERVED AND MUST BE CORRECTED:

On March, 14, 2017, I met Ms. Crystal Heady-Fenwick at her newly purchased food facility. The purpose of the visit was to conduct a walk-through observation prior to her pre-opening inspection.

During this visit, I made the following observations:

- *Both refrigerators held bottled beverages and were at 41F or lower; the chest freezer temperature was -10F.
- *Discussion on wash, rinse, sanitize, and air dry of all food equipment, and which equipment requires sanitizing (microwave, all food contact surfaces)
- *Plastic utensils were stored with their handles down; please store with handles up to prevent contamination of food-contact surface when retrieving
- *Discussion of use of handwashing sink is for handwashing only; it is to remain accessible at all times.
- *Chemicals may not be stored over clean equipment, food, single-use items, or clean linens.
- *Preparation of sanitizer using regular unscented household bleach. Prepare at 50 to 100 ppm chlorine (approximately 1/2 teaspoon per gallon of water).
- *One table top was damaged on the edge, allowing exposure of raw pressed board. Please repair or replace to make surface cleanable and non-absorbent. Seal edges.
- *Discussed procedure to calibrate food thermometer.
- *Discussed trash handling: an outside dumpster will be used. Dumpster shall have lids that are kept closed and a plug in the drain, if a drain is provided. It was noted the lids were cracked, allowing a large space between. If used, either replace lids or dumpster. A trash can may be used as long as it has tight fitting lids, nonabsorbent, cleanable, and pest resistant.
- *The outside entry door was not self-closing nor sealed. Please make either the screen door or the wood door self-closing and sealed to reduce pest entry points.
- *Light bulbs in food prep areas shall be shielded or shatter-resistant. Please use a shatter-resistant bulb in the popcorn maker.
- *Hamburger shall be cooked to 155F or higher. Food that is fully cooked and held hot, shall be reheated to a minimum 165F for 15 seconds, then held at 135F or higher (example: hot dogs).
- *Cut lettuce and cut tomatoes shall be held at 41F or lower.
- *The bathroom shall be supplied with a lidded trash can if used by females.

INSPECTED BY Rose Mier <i>Rose Mier</i>	EPHS NUMBER 1390	
AGENCY NAME St. Francois County Health Center	TELEPHONE NUMBER (573) 431 - 1947	FAX NUMBER (573) 454 - 2424
