Code Reference	PRIORITY ITEMS Priority items contribute directly to the elimination, prevention or reduction to an acceptable level, hazards associated with foodborne illness or injury. These items MUST RECEIVE IMMEDIATE ACTION within 72 hours or as stated.				Correct by (date)
NOTE	A water sample to analyze for bacterial safety was collected on July 20, 2016. The sample was bacterially safe for drinking water. On the same day, a water sample was collected for mineral analysis, as required annually for chlorinated water supplies at regulated facilities. The mineral analysis was within acceptable limits except for fluoride, which was measured at 4.6 mg/L. The EPA maximum containment level for this compound is 4.0 mg/L. Because this well is regulated by the Missouri Department of Natural Resources, Mr. Michael Wyatt of that entity was notified. He stated that, because the well is a transient, non-community public well, the high level is not as great a concern as it would be if it were a non-transient well.				
NOTE	A current copy of the FDA Employee Health and Hygiene Handbook was provided to Ms. Nelson during this visit to use in training her food workers and developing a health policy.
