DATE

November 10, 2016

NOTES

I arrived at this facility and observed the overhead garage door was closed. The entry to the daycare facility is through a door inside the garage, and the overhead garage door is normally open when I have been to this facility in the past. I knocked on the overhead door, on the window of the day care facility, and on the entry door into the family's living space. A man came to the door and recognized me as an inspector. I asked if Ms. Bergner was available. He stated she was recovering from surgery and the daycare was closed until she recovers, probably after the first of the year. He said the state was notified that the daycare was inactive.

After this conversation, I contacted the Mo DHSS to discuss this inspection. I was told that Paula Cates will be notified. Paula Cates emailed me on November 14, stating that she will conduct the inspection because it is an inactive daycare.

The above facility has been **inspected** and does does not conform with the sanitation requirements of the Missouri Department of Health and Senior Services Section for Child Care Regulation.

The inspector has discussed the issues marked by an asterisk (*) and/or marked by an (X) on this form. I agree to comply with these requirements.
