Code Reference	PRIORITY ITEMS Priority items contribute directly to the elimination, prevention or reduction to an acceptable level, hazards associated with foodborne illness or injury. These items MUST RECEIVE IMMEDIATE ACTION within 72 hours or as stated.	Correct by (date)	Initial
Note: 2-201.11 A-E	During this visit an employee health policy agreement was provided by Ms. Warden. This policy appeared to convey the requirements listed in the Missouri Food Code. However, there was no correlation in the policy between symptoms of illness and diagnosed illnesses with respect to when a food employee would be restricted in duties or excluded from work. Please provide this correlation.		
Note: 3-603.11 A-C	During this visit I observed a consumer advisory posted on the wall above the fountain beverage station. The consumer advisory stated that beef and eggs were served in a raw or undercooked state and by consuming these foods the increased risk of contracting foodborne illness was possible. It is recommended that additional signage postings be provided in more visible locations within the food establishment, added to the menu or provided by table toppers, etc.		
3-501.17B	Sliced ham and sliced turkey observed in the McCall 2 door refrigerator labeled with discard dates for May 2016 and for 8 days instead of 7 days as required in the Missouri Food Code. One package of sliced ham was observed without any date marking. Please be advised that ready-to-eat (RTE) potentially hazardous foods (PHF's) refrigerated for more than 24 hours must be labeled with a discard date that is NO MORE than 7 days from the date of package opening or preparation, (i.e. the date of package opening/preparation plus 6 days). (Corrected on-site by relabeling the foods with the correct month and the correct number of days).	COS	AW
Note: 3-501.17B	Per kitchen staff RTE, PHF's are not held under refrigeration for more than 24 hours in the reach-in prep. fridges along the cook line.		

Code Reference	CORE ITEMS Core items relate to general sanitation, operational controls, facilities or structures, equipment design, general maintenance or sanitation standard operating procedures (SSOPs). These items are to be corrected by the next regular inspection or as stated.	Correct by (date)	Initial
4-302.14	No test strips for monitoring quaternary ammonia sanitizing agents were present. Please obtain.	4/28/16	AW
