The well was shocked approximately 10 days ago.</p> <p>A water sample was collected this day for bacteriological analysis. It is the first of two samples after the well was treated.</p> <p>The second water sample will be taken in seven to ten days.</p> <p>Because the water has not been shown to be safe at this time, please continue to use bottled water for drinking and provide hand sanitizer at the handwashing sink. Dishes may continue to be cleaned with the water as long as sanitizer is used. This is in effect until the a water sample analysis shows the water is bacterially safe to drink. Please shock the well by adding regular, unscented household bleach, opening all taps until chlorine is detected, close taps and allow to sit a minimum of 8 hours. Then open all taps and allow to run until chlorine is no longer detected.
