FOOD ESTABLISHMENT INSPECTION REPORT

TIME IN	9:45am	TIME OUT	2:10pm
DATE	2-2-18	PAGE	1 of 4

BASED ON AN INSPECTION THIS DAY, THE ITEMS NOTED BELOW IDENTIFY NONCOMPLIANCE IN OPERATIONS OR FACILITIES WHICH MUST BE CORRECTED BY THE NEXT ROUTINE INSPECTION, OR SUCH SHORTER PERIOD OF TIME AS MAY BE SPECIFIED IN WRITING BY THE REGULATORY AUTHORITY. FAILURE TO COMPLY WITH ANY TIME LIMITS FOR CORRECTIONS SPECIFIED IN THIS NOTICE MAY RESULT IN CESSATION OF YOUR FOOD OPERATIONS.

These items are to be corrected by the next regular inspection or as stated.	Correct by (date)	Initial
----------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------	---------

4-901.11	Plastic food containers were observed wet nested on the shelving below the front service area. After cleaning and sanitizing, food equipment shall be air dried. COS by moving the equipment to ware washing.	COS	PA
6-501.11	A stained ceiling tile was observed outside the storage room. Physical facilities shall be maintained in good repair. Please paint or replace the tile and continue to monitor for leaks.	2-16-18	PA
5-501.16C	A trash can was not available at the hand wash sink in the ware washing room. Hand wash sinks shall be provided with a waste receptacle for used disposable paper towels. Please place a waste can in this area.		
4-203.11A	The kitchen metal stem food thermometers were tested for accuracy. All four were inaccurate by 8 - 10 degrees. Food temperature measuring devices shall be accurate to within two degrees F. COS by calibrating the thermometers.		
4-203.12B	The integral thermometers of the Victory cooler #1 and both Victory hot cabinets were measured to be inaccurate by 4 - 6 degrees F. Ambient temperature measuring devices shall be accurate to within three degrees F. Please repair the integral thermometers to accuracy or place an accurate thermometer within these units. This condition is likely to have contributed to the food hot holding violations cited on page four of this report.

----------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------	---------

3-501.14A B	Pasta salad was measured at 77F in the Victory cooler #2 in the kitchen. According to the manager, the pasta had been prepared fresh that morning and cooled with cold water prior to preparing the salad. The additional ingredients in the salad were not refrigerated. The cooled temperature of the pasta prior to preparing the salad is not known. Potentially hazardous foods held refrigerated shall be maintained at 41F or less. Based on conversation with the manager, she is aware of the cooling requirements for potentially hazardous foods. The temperature of the salad as stored in the cooler was not at the first benchmark temperature for cooled foods. Prior to being placed in the cooler; the cooled food should be at 70F or less. The temperature of the salad may be a function of uncooled ingredients added to the pasta prior to placing in cold holding. It is recommended that all ingredients of cold salads be chilled prior to combining. Please be aware that potentially hazardous foods that are cooled from 135F to 70F must be cooled to 41F within an additional maximum time of four hours. COS by discussion.	COS	
4-501.114 A	Residual chlorine was not detected in the sanitation cycle of the mechanical dishwasher. Chlorine sanitizers shall be in the range of 50 - 100 ppm. Efforts to correct the violation were unsuccessful. Until the dish washer has been repaired; sanitize all food equipment in the three compartment sink.	2-16-18

----------------	--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------	-------------------	---------

3-501.16A	BBQ chicken sandwiches held hot were measured at 126F. Chicken patties held hot were measured at 130F. Hamburger patties held hot were measured at 126F. The meat from which the BBQ chicken was prepared was measured at 156F. It is not known what the final heating temperature of the chicken and beef patties were prior to placing in hot holding. The ambient temperatures of the hot holding cabinets was measured at 142F and 134F. Based on this information, the ambient temperature settings on the heating cabinets were determined to be insufficient to hold foods at adequate temperatures. COS The hot cabinet temperatures were adjusted resulting in adequate hot held food temperatures. Please ensure that the hot holding cabinets are heated adequately prior to placing hot held foods within.	COS
