4-601.11A	Note: Upon arrival it was noticed that an "Out of Order" sign had been placed on the mechanical dishwasher. The staff has indicated that they have had problems with the machine since it's installation in October of 2017. The installer has made efforts to correct the issues. Most recently the staff has indicated that there appears to be a residue of oil droplets floating on the surface of the basin water after the rinse/sanitize cycle. They have also indicated that the chlorine concentration has been too high. I ran the dish washer through a few cycles and did observed what appeared to be small amounts of fine oil droplets on the surface of the basin water at the end of a wash cycle. The chlorine concentration was measured at 100 ppm. I observed very small oil spots on the surface of plastic trays after the equipment has been machine washed and air dried. Food contact surfaces shall be clean to sight and touch. Discontinue the use of the mechanical dishwasher and wash, rinse and sanitize all food equipment in the three compartment sink until the dishwasher has been repaired and the issue has been corrected.	2-28-18
