

MISSOURI DEPARTMENT OF HEALTH AND SENIOR SERVICES  
 BUREAU OF ENVIRONMENTAL HEALTH SERVICES  
**FOOD ESTABLISHMENT INSPECTION REPORT**

|         |               |          |         |
|---------|---------------|----------|---------|
| TIME IN | 10:44 am      | TIME OUT | 3:35 pm |
| DATE    | July 17, 2017 | PAGE     | 1 of 7  |

BASED ON AN INSPECTION THIS DAY, THE ITEMS NOTED BELOW IDENTIFY NONCOMPLIANCE IN OPERATIONS OR FACILITIES WHICH MUST BE CORRECTED BY THE NEXT ROUTINE INSPECTION, OR SUCH SHORTER PERIOD OF TIME AS MAY BE SPECIFIED IN WRITING BY THE REGULATORY AUTHORITY. FAILURE TO COMPLY WITH ANY TIME LIMITS FOR CORRECTIONS SPECIFIED IN THIS NOTICE MAY RESULT IN CESSATION OF YOUR FOOD OPERATIONS.

| Fish, deep fryer                         |  | 209 to 212                             | True 2-door cooler: ambient                  |                                | 36           |
| Hush puppy mix, slaw on ice              |  | 46, 40                                 | Insulated hot hold, in storage room, ambient |                                | 170          |
| Buttermilk on ice                        |  | 41                                     |  |                                |              |

| Code Reference | PRIORITY ITEMS   | Correct by (date) | Initial |
|----------------|--|-------------------|---------|
|                | Priority items contribute directly to the elimination, prevention or reduction to an acceptable level, hazards associated with foodborne illness or injury. <b>These items MUST RECEIVE IMMEDIATE ACTION within 72 hours or as stated.</b>   |                   | WB      |
| 3-501.14B      | Cole slaw that was freshly prepared in a large, gray tub had an internal temperature of 62F. Potentially hazardous food that is prepared from ingredients at ambient temperature shall be cooled to 41F within four hours. According to staff, the temperature of the cooling food is not monitored. Please record time and temperature when placed in the cooler, and monitor to ensure food reaches 41F within four hours. To facilitate cooling, divide food into shallow containers, nest in an ice bath, stir. Please monitor cooling of slaw.  | 7/19/17           |         |
| 3-501.17B      | Food was not labeled with the date of disposition. Potentially hazardous food that is fully cooked or ready-to-eat and held for more than 24 hours shall be labeled with the date of disposition, which is the date of opening (if commercially prepared) or the date of preparation, plus an additional six days. COS by labeling   | COS               |         |
| 3-501.16A      | Containers of prepared hush puppy mix and slaw were stored with the bottom of the container in contact with ice. To keep the food cold, ice needs to be in contact with the sides of the containers as far up as possible. At the beginning of food preparation, the hush puppy mix had an internal temperature of 46F and the slaw of 40F. CORRECTED ON SITE by adding ice to all containers that had food containers nested in them (chicken, slaw, hush puppy mix).   | COS               |         |
| 4-601.11A      | Debris was observed on numerous pieces of clean equipment and utensils: plate stored below microwave, numerous equipment on shelf below heat table; slotted spoon, spatula turner, strainer, and lid on drying racks above the 3-vat and 2-vat sinks; orange tray, plate, and bowls on rack by Panasonic microwave. Because of the numerous pieces of equipment with debris on them, please inspect all clean equipment and return soiled items to warewashing area for cleaning. Please use a 6-step method for cleaning food contact surfaces: (1) scrape/rinse, (2) wash, (3) rinse, (4) sanitize, (5) air dry, (6) inspect before storing. | 7/17/17           |         |
| 4-601.11A      | Dried food debris observed on the inside of the door and cavity of the Panasonic microwave. Please wash, rinse, and sanitize inside of microwave a minimum of every four hours, more often if needed.  | 7/17/17           |         |

| Code Reference | CORE ITEMS  | Correct by (date) | Initial |
|----------------|---|-------------------|---------|
|                | Core items relate to general sanitation, operational controls, facilities or structures, equipment design, general maintenance or sanitation standard operating procedures (SSOPs). <b>These items are to be corrected by the next regular inspection or as stated.</b>                                   |                   | WB      |
| 6-202.15A      | The back entry door did not fully self-close. Outside entries shall be self-closing and sealed. Please repair or replace self-closure device on this door.  | 7/19/17           |         |
| 3-501.13B      | Fully cooked corn was thawing submerged under water in the sink. Food shall be thawed submerged under cold running water. Please allow cold water to flow from faucet during thawing process.   |                   |         |
| 4-904.11B      | A spoon was stored with the handle down in a canister on the prep table. Unwrapped utensils shall be stored with the handles up to prevent contamination of the food-contact surface when retrieving. Please store utensils with handles up.  |                   |         |
| 4-601.11B      | Accumulation of debris observed on the inside of the oven. Please clean at a frequency to prevent baked-on debris from accumulating.  |                   |         |
| 4-501.14       | Accumulation of debris on the head of the spring sprayer at the 3-vat sink. Warewashing equipment shall be kept clean. Please clean sprayer head and handle as often as needed to keep clean.   |                   |         |
| 4-903.11A      | Debris was observed inside several canisters that held utensils on the waitress prep table in the kitchen. Equipment shall be protected from contamination while in storage. Please clean and sanitize holders as often as needed to keep clean.  |                   |         |
| 4-903.11A      | Clean plates, bowls, etc. were stored unprotected throughout the kitchen. Debris was observed on several of the top pieces. Clean equipment shall be protected while in storage. Please invert entire stack or the top dish, cover with clean cloth, etc. to protect from contamination while in storage. |                   |         |
| 3-305.11A      | In-use oven mitts were stored on top of packages of buns on the shelf below the waitress prep table. Food shall be protected from contamination. Please store oven mitts in an area where food, clean equipment, clean linens, and single-use items cannot be contaminated.                               |                   |         |

EDUCATION PROVIDED OR COMMENTS

NOTE: A follow-up inspection will be conducted on July 19 to verify temperature violation corrections. A second follow-up inspection will be scheduled at that time for any remaining violations.

| Code Reference   | PRIORITY ITEMS   | Correct by (date) | Initial |
|--|--|-------------------|---------|
| Priority items contribute directly to the elimination, prevention or reduction to an acceptable level, hazards associated with foodborne illness or injury. <b>These items MUST RECEIVE IMMEDIATE ACTION within 72 hours or as stated.</b> |  |                   |         |
| 4-601.11A  | Accumulation of debris observed on the heat lamp above the hot hold table. Please clean the lamp to prevent debris from falling into food.   | 7/19/17           | WB      |
| 3-501.16A  | A container of corn on the cob that is held on ice by the breeding station was not nested into the ice. The upper portions of the corn had temperatures 57F to 62F. Because this is cooked corn, it shall be held at 41F or lower. Please monitor food temperatures to ensure they remain at 41F or lower by adding ice, placing in shallow containers, or placing in a cooler. NOTE: corn was placed in the walk-in cooler.                           | 7/17/17           |         |
| 4-601.11A  | Dust and debris were observed on the lamps in the smaller hood nearest the breeding station. Please clean lamps and holders as often as needed to prevent debris from falling into food.   | 7/19/17           |         |
| 4-202.11A  | A rubber spatula and a ladle, stored hanging above the 2-vat food prep sink, were marred. Food contact surfaces shall be free of imperfections. Please dispose of all equipment and utensils that have breaks, cracks, and other imperfections.  | 7/17/17           |         |
| 4-601.11A  | Debris observed on the blade and the area behind the blade of the table-mounted can opener. Food contact surfaces shall be clean to sight and touch. Please wash, rinse, and sanitize the can opener blade and blade holder a minimum of every four hours while in continual use, or after each use if used less often.  | 7/17/17           |         |
| 3-501.16A  | The walk-in cooler had an ambient temperature of 44F; food held inside had internal temperatures of 44 to 45F. Potentially hazardous food shall be held at 41F or lower. Please have unit serviced. NOTE: because food was not disposed, please use a cook's thermometer to ensure cooked food held in this unit is reheated to 165F for 15 seconds before hot holding, and that raw animal-derived foods are cooked to required minimum temperatures. | 7/19/17           |         |

| Code Reference  | CORE ITEMS  | Correct by (date) | Initial |
|---|---|-------------------|---------|
| Core items relate to general sanitation, operational controls, facilities or structures, equipment design, general maintenance or sanitation standard operating procedures (SSOPs). <b>These items are to be corrected by the next regular inspection or as stated.</b> |   |                   |         |
| 3-304.12A   | The handle of an in-use scoop, stored in the hush puppy mix, was in contact with the food. Handles shall be stored above the surface of the food. Please store in-use utensils with the handle above the food.  | 7/19/17           | WB      |
| 3-304.14  | A wet cloth was stored on the work table of the 3-vat sink. Wet wiping cloths shall be stored in sanitizer between uses. Please provide a labeled sanitizer bucket for wet wiping cloths.   |                   |         |
| 4-601.11C   | The racks, bottom shelf, and sliding door ledges inside the True 2-door cooler were dirty. Towels were stored in the bottom and a bucket to catch drips were inside. Liquid with food debris provides a hospitable environment for bacterial and fungi growth. Please keep inside of cooler clean and dry. Determine source of liquid and repair or replace unit.   |                   |         |
| 3-307.11  | Employee food (pudding, fruit, drinks) were stored with facility food in the True 2-door cooler. Employee food shall be stored in a designated tub or area in the bottom of the cooler to prevent contamination of facility food. COS by placing employee food in container in bottom of walk-in cooler.  |                   |         |
| 5-203.13  | The mop sink that used to be in the kitchen was replaced with a 3-vat sink used to dump ice, beverages, etc. Staff stated mop water was disposed in various sinks. A service sink or curbed cleaning facility equipped with hot and cold running water shall be provided for disposal of cleaning liquids and for cleaning mops, and located where food, clean equipment and utensils, single use items, and clean linens cannot be contaminate |                   |         |
| 4-203.12A   | The thermometer read-out on the heated insulated cabinet in the storage room read 153F when the actual temperature was 170F. Please install an accurate thermometer on the inside of this unit in an easy-to-read location.   |                   |         |
| 6-501.12A   | Accumulation of debris observed on the ceiling and insulation cover above the bag-in boxes in the storage room, and panel in ceiling was gaped. Please clean ceiling and cover, and reattach panel for duct work.   |                   |         |

| ESTABLISHMENT NAME<br>The Catfish Kettle |  | ADDRESS<br>775 Weber Road / PO Box 961 |                        | CITY /ZIP<br>Farmington 63640 |              |
| FOOD PRODUCT/LOCATION                    |  | TEMP. in ° F                           | FOOD PRODUCT/ LOCATION |                               | TEMP. in ° F |
|  |  |  |                        |                               |              |
|  |  |  |                        |                               |              |
|  |  |  |                        |                               |              |
|  |  |  |                        |                               |              |

| Code Reference | PRIORITY ITEMS<br>Priority items contribute directly to the elimination, prevention or reduction to an acceptable level, hazards associated with foodborne illness or injury. <b>These items MUST RECEIVE IMMEDIATE ACTION within 72 hours or as stated.</b>   | Correct by (date) | Initial |
|----------------|--|-------------------|---------|
| 5-402.11A      | There was no observable air break in the drain below the 3-vat sink near the warewashing area. Sinks in which food or equipment are placed shall be protected from sewage back-up with an indirect drain. Please install an indirect drain on this sink. The sink was observed being used to dump ice and beverages, and to rinse utensils during this visit.  | 7/19/17           | WBS     |
| 8-301.11B      | At the time of the approved pre-opening inspection, the kitchen was equipped with one handwashing sink and a mop sink. During this visit, it was observed that the mop sink was repositioned 90 degrees with its back against the side of the True 2-door refrigerator and designated as the handwashing sink. The prior handwashing sink was removed and replaced with a mini 3-vat sink. These changes are defined as "extensive renovations" in the Missouri Food Code: "Extensive renovation means a physical change to portions of the food establishment designated for food preparation, food storage and/or warewashing. Examples include, but are not limited to building additions, demolition of interior or exterior walls, the additional or removal of hand sinks, three compartment sinks, or service sinks. The operator of a food establishment must obtain written approval from the regulatory authority before beginning an extensive renovation of an existing food establishment. Sinks were removed and installed without prior knowledge or approval by this office. Please contact our office before beginning extensive renovation work. | 7/17/17           |         |
| 3-305.11A      | Employee vapor smoke and drink (lidded with straw) were stored with and above food and single-use items in the storage room with chemicals. Employee personal items and covered drinks shall be stored in a designated area where food, single-use items, clean linens, and clean equipment cannot be contaminated.  | 7/17/17           |         |

| Code Reference | CORE ITEMS<br>Core items relate to general sanitation, operational controls, facilities or structures, equipment design, general maintenance or sanitation standard operating procedures (SSOPs). <b>These items are to be corrected by the next regular inspection or as stated.</b>                                       | Correct by (date) | Initial |
|----------------|---|-------------------|---------|
| 5-205.11A      | A handwashing sink was installed next to the True 2-door cooler. The front access of the sink is blocked by a 3-vat sink, and the side access by a drainboard. Handwashing sinks shall be convenient to use and accessible. Please provide a handwashing sink that has easy access to its front.                            | 7/19/17           | WB      |
| 6-301.14       | There was no sign at the handwashing sink in the kitchen to remind users of the importance of washing hands. Please install a sign at this handwashing sink.  |                   |         |
| 6-501.12A      | Accumulation of debris observed in the entire warewashing area: walls (including excessive mold growth around warewashing machine and under table), floors (including mold), pipes (including mold), clean equipment rack, wall fan, air conditioner. Please clean all equipment, walls, and floor in the warewashing area. |                   |         |
| 4-302.14       | Sanitizer test strips to check the concentration of chlorine in the sanitizing cycle of the warewashing machine were no longer indicating (too old). Please provide usable test strips at all times to ensure chlorine is between 50 and 100 ppm.   |                   |         |
| 4-501.14       | Accumulation of grease and debris observed on the pipes and inside doors of the warewashing machine, and on the top of the machine. Warewashing equipment shall be cleaned at least daily, more often if needed to keep clean.  |                   |         |
| 4-501.14       | The spray head and spring arm on the pre-cleaning station in the warewashing area were dirty. Please clean as often as needed to keep clean.  |                   |         |
| 6-501.11       | Tape was used as a repair behind the sprayer in the warewashing area. Please remove tape and make repair(s). Clean tape residue, debris, and mold from wall, and sanitize to reduce mold growth.  |                   |         |
| 6-501.12A      |   |                   |         |

|----------------|--|-------------------|---------|
| 3-305.11A      | Boxes of Jello were stored on the floor in the storeroom. Food shall be stored a minimum of six inches off floor. Please elevate food off floor.   | 7/19/17           | WB      |
| 3-304.12B      | The handle of in-use scoops, one stored in the bulk container of bone-in chicken breading, one in the bulk container of self-rising flour, one in the bulk container of all-purpose flour, were in contact with the breading and flours. Please store with handles above surface of food to protect food from contamination.   |                   |         |
| 6-501.12A      | Accumulation of food debris and dead insects observed near the floor-wall juncture, behind and under equipment, in the storage room holding the furnace. Please thoroughly clean floor.  |                   |         |
| 4-803.11       | A soiled apron was stored on shelf above flour on the rack near the back entry. Soiled laundry shall be stored in a cloth hamper that is washed, or in a cleanable, non-absorbent container, where food, clean equipment, clean linens, and single-use items cannot be contaminated. Please store soiled linens in appropriate place, or place in designated area for employee belongings. |                   |         |
| 6-501.14A      | Accumulation of debris observed on the cover over the fan in the storage room holding chemicals near the back entry. Ventilation systems shall not be a source of contamination. Please clean fan cover.   |                   |         |
| 4-203.11B      | The cook's thermometer was digital but not operable (perhaps needing new battery). Food thermometers shall be accurate. Please provide at least one thermometer (more is preferable) to check food temperatures (both hot and cold foods).   |                   |         |
| 2-301.14       | Employees were observed washing hands in the 3-vat sink, located near the handwashing sink, because the handwashing sink is not accessible. Hands shall be washed only at handwashing sinks. Please ensure all employees use the handwashing sink to wash hands.   |                   |         |
