No temperatures were taken during this visit.			

Code Reference	PRIORITY ITEMS	Correct by (date)	Initial
----------------	----------------	-------------------	---------

NOTE	<p>Priority items contribute directly to the elimination, prevention or reduction to an acceptable level, hazards associated with foodborne illness or injury. <b>These items MUST RECEIVE IMMEDIATE ACTION within 72 hours or as stated.</b></p> <p>The thermolabel which I placed on a metal bowl to check the temperature of the sanitizing cycle of the mechanical dish washer did not turn black. However, the manager provided a thermolabel that correctly turned orange when the correct sanitizing temperature was reached at the surface of the dish. Additionally, a probe was placed on the dish surface and the rinse temperature was recorded as 172F at the dish surface. It is possible my thermolabel was not functioning correctly. The evidence from the orange thermolabel and the temperature probe is accepted that the machine is sanitizing correctly. Please continue to use thermolabels when there is a lapse in time between uses of the machine to ensure the water reaches the correct temperature before using it for sanitizing.</p> <p>All priority items noted on the September 13, 2017 routine inspection have been corrected.</p>
