### A. GENERAL

1. Clean and free of unsanitary conditions. **X**
2. No environmental hazards observed. **X**
3. No evidence of insects, spiders, rodents or pest entry points, or pest harborage.
4. Well ventilated, no evidence of mold, noxious or harmful odors.
5. Screens on windows and doors used for ventilation in good repair.
6. No indication of lead hazards.
7. No toxic or dangerous plants accessible to children.
8. Medicines and other toxic agents not accessible to children. Child contact items stored to prevent contamination by medicines, other toxic agents, cleaning agents and waste water drain lines.
9. All sinks equipped with mixing faucets or combination faucets with hot and cold running water under pressure.
10. Hot water temperature at sinks accessible to children - 100°-120°F. Temp at time of Inspection 112°F.
11. Pets free of disease communicable to man.
12. Pets living quarters clean, and well maintained.
13. Reptiles are prohibited on the premises. Birds of the Parrot Family tested for Psittacosis.
15. A minimum of 18" separation between drinking fountains and hand sinks.
16. No high hazards cross-connections.

### B. WATER SUPPLY (circle type)

- **COMMUNITY**
- **NON-COMMUNITY**
- **PRIVATE**

1. Constructed to prevent contamination.
2. Meets DHSS-SCCR water quality requirements.
   - A. Bacteriological sample results.
   - B. Chemical (Prior SCCR Approval Needed)

### C. SEWAGE (circle type)

- **COMMUNITY**
- **ON-SITE**

1. DNR Regulated System:
   - Type: 
2. DHSS Regulated System:
   - Type: 
   - Meets DHSS-SCCR requirements.
3. Meets local requirements.

### D. HYGIENE

1. Care givers and children wash hands using soap, warm running water and sanitary hand drying methods.
2. Care givers and children wash hands BEFORE: preparing, serving, and eating food, glove use. AFTER: toileting, diapering, assisting with toileting, nose blowing, handling raw food, glove use, cleaning and sanitizing, outdoor play, handling animals, eating, smoking, and as necessary.
3. Personal preparing/serving food is free of infection or illness.

### E. FOOD PROTECTION

1. Food from approved source and in sound condition; no excessively dented cans.
2. No use of home canned food. No unpasteurized milk.
3. Ground beef cooked to 155°F, poultry and poached eggs to 165°F, pork to 145°F and all other foods cooked to at least 140°F. All hot food kept at 140°F or above.
4. Precoked food reheated to 165°F.
5. Food requiring refrigeration stored at 41°F or below.
6. Refrigerator 41°F or below, accessible readable thermometer required. Foods in freezer frozen solid. Temp at time of inspection 36°F.
7. Metal stemmed thermometer reading 0°F - 220°F in 2° increments for checking food temperatures. (Also use to check hot water temperature.)
8. Food, food related items, and utensils covered, stored and handled to prevent contamination by individuals, pests, toxic agents, cleaning agents, water drain lines, medicines, dust, splash and other foods. No bare-hand contact of ready-to-eat foods.
9. Food, toxic agents, cleaning agents not in their original containers properly labeled.
10. No food or food related items stored or prepared in diapering areas or bathrooms.
11. Food stored in food grade containers only.
12. Food thawed under refrigeration, 70°F running water, or microwave (if part of the cooking process).
13. No animals in food preparation or food storage areas.
14. No eating, drinking, and/or smoking during food preparation.
15. Food served and not eaten shall not be reserved to children in care.
16. Refrigerated potentially hazardous foods properly marked with 7-day discard date after opening or preparation.

### F. CLEANING AND SANITIZING

1. All items requiring sanitizing shall be washed, rinsed and sanitized with approved agents, methods, and concentrations.
2. All utensils and toys air dried.
3. The following items washed, rinsed and sanitized after each use:
   - A. Food utensils
   - B. Food contact surfaces including eating surfaces, high chairs, etc.
   - C. Potty chairs and adapter seats
   - D. Diapering surface
   - E. All toys that have had contact with body fluids
4. The following items are washed, rinsed and sanitized at least daily:
   - A. Toilets, urinals, hand sinks
   - B. Non-absorbent floors in infant/toddler spaces
   - C. Infant/Toddler toys used during the day
5. Walls, ceilings, and floors clean and in good repair. Cleaned and sanitized when contacted by body fluids.
6. Appropriate test strips available and used to check proper concentration of sanitizing agents.
7. Soiled laundry stored and handled in a manner which does not contaminate food, food related items and child contact items.
G. FOOD EQUIPMENT AND UTENSILS
1. Single service items not reused.
2. All food equipment and utensils in good repair.
3. Food preparation and storage areas have adequate lighting.
4. Kitchen equipment that produces excessive grease laden vapors, moisture or heat is properly vented.
5. Facilities shall have mechanical refrigeration for facility use only.

   Exception: License-Exempt facilities approved BEFORE October 31, 1997

6. No carpeting or absorbent floor coverings in food preparation area.
7. Adequate preparation and storage equipment for hot foods.
8. Facilities with a capacity of 20 children or less shall have:
   A. Mechanical dishwasher that sanitizes; or employ an additional sanitizing rinse in conjunction with the mechanical dishwasher; or use a 3 compartment sink.
   B. If a mechanical dishwasher is used, a minimum of two sinks located in food preparation area labeled as:
      1) Hand washing only  2) Food preparation only.

9. Facilities with a capacity of more than 20 children approved BEFORE October 31, 1991, shall have:
   A. Mechanical dishwasher that sanitizes; or employ an additional sanitizing rinse in conjunction with the mechanical dishwasher; or use a 3 compartment sink.
   B. If a mechanical dishwasher is used, a minimum of two sinks located in food preparation area labeled as:
      1) Hand washing only  2) Food preparation only.

10. Facilities with a capacity of more than 20 children approved AFTER October 31, 1991, shall have:
    A. Facility located in provider's residence shall have separate food preparation and storage areas.
    B. A commercial dishwasher or a 3 compartment sink in addition to a separate hand washing sink.
    C. If a commercial dishwasher is used, a sink located in food preparation area labeled as food preparation.

H. CATERED FOODS
1. Catered food from inspected and approved source.
2. Safe food temperature maintained during transport.
   Temperature at arrival __________°F.
3. Facility using catered food exclusively shall have a hand washing sink in kitchen/food service area.
4. Facility not using single service utensils exclusively meets applicable dishwashing requirements as stated in Section G(B), or G(9), or G(10).
5. Food and food related items protected from contamination during transport.

I. BATHROOMS
1. Cleaned as needed or at least daily.
2. Paper towels stored and dispensed in a manner that minimizes contamination. All equipment in good repair.

3. Facilities approved AFTER October 31, 1991 have:
   Enclosed with full walls and solid doors. Doors closed when not in use.

4. Facilities approved AFTER October 31, 1998 have:
   Mechanically vented to prevent molds and odors.

5. Hand washing sinks located in or immediately adjacent to the bathroom.
6. No carpeting or absorbent floor coverings.
7. Sufficient lighting for cleaning.

J. INFANT / TODDLER UNITS
1. If food preparation occurs, shall have a sink for food preparation separate from the diapering hand washing sink.
2. Utensils used in the I/T Unit washed, rinsed and sanitized after each use with proper methods and equipment.

K. DIAPERING AREA
1. No utensils or toys washed, rinsed or stored in the diapering area.
2. Hand sink with warm running water located in the diapering area immediately accessible to the diapering surface.
3. Diapering surface smooth, easily cleanable, nonabsorbent and in good repair.
4. Soiled diapers stored in a solid, nonabsorbent container with tight fitting lid located in diapering area.
5. Soiled diaper container emptied, washed, rinsed and sanitized daily.

L. REFUSE DISPOSAL
1. Adequate number of containers.
2. Clean, nonabsorbent, in sound condition.
3. Outside refuse area clean; containers covered at all times.
4. Inside food refuse containers covered as required.
5. Restrooms used by staff have covered refuse containers.

No food was prepared during this inspection.
A8) A bottle of liquid medicine was observed in an open Ziplok bag on a shelf above the three compartment sink in the kitchen. Medicines and other toxic agents shall not be accessible to children and shall be stored to prevent contamination of child contact items. COS by sealing the bag.

A1) Food residue was observed inside the microwave in the kitchen. The premises shall be clean and free of unsanitary conditions. COS by cleaning the microwave.

A2) Aerosol disinfectant/deodorizer was observed in the walk-way between the kitchen and the adjacent playroom. The premises shall be free of environmental hazards. COS by removing this product from the premises.

A2) Various pesticides including HotShot fogger, and aerosol disinfectant/deodorizers and Fabreeze were observed stored in the storage room in the 3-4 year old classroom. There shall be no environmental hazards. COS by removing these products from the premises.

E9) Paper towels were observed on the floor in the storage room in the 3-4 year old classroom. Single use items shall be protected from contamination by storing them at least six inches off of the floor. COS by removing the towels from the floor.

A2) Aerosol disinfectant/deodorizers were observed on a shelf in the toddler's room. The premises shall be free of environmental hazards. COS by removing these products from the premises.

A2) Aerosol disinfectant/deodorizer and hornet and wasp spray were observed on the shelf in the school age room. The premises shall be free of environmental hazards. According to the facility owner Ms. Proctor, the hornet and wasp spray is on the premises to kill stinging insects and to deter potential intruders. I consulted MDHSS EPHS-V Autumn Grimm concerning this issue. Ms. Grimm instructed me to inform Ms. Proctor that she must remove the product from the premises. COS by removing these products from the premises.

Note: The condition of the wood on the playground equipment was observed and appeared to adequately seal the wood. Ms. Proctor has indicated that an additional application of sealant will be applied to the wood this month.

Note: Commercial disinfectant wipes were observed at various locations in the facility. Please be aware that this product is not approved as a sanitizer and that it may not be used alone on anything that the children may contact. This product may be used to DISINFECT surfaces which have been contaminated by blood, vomit or feces provided that the surfaces is subsequently washed, rinsed and sanitized with an approved agent.
