**SECTION #****OBSERVATIONS**

NOTE: O=Observed, R=Required, COS=Corrected on Site

Page 3-3

A6:

O: Gravel was observed missing from parts of the playground area as needed as part of the lead abatement plan.

R: No indication of lead hazards.

NOTE: As part of lead abatement for this facility the playground shall be covered with a durable plastic barrier and then covered with 3-4 inches of pea gravel. Several areas in the playground near the fire hydrant were observed with bare dirt or sparse gravel. I contacted Jon Peacock Mo DHSS as he was the one that conducted the original assessment. I asked if there had ever been a permanent abatement for this facility that he was aware of, as I could not find anything in the file. He said I should speak to the facility owner, the previous owner, or contact the EPA, to try and determine if the outside area was abated of all lead risks. Owner believes that outside playground area was replaced with outside soils by the EPA.

During this follow-up inspection I provided Ms. Spivey with a contact at the EPA (Mr. Gunter) so she could try and verify if the facility had re-mediated lead hazards in the play ground area.

A desk approval will be given if documentation from the EPA of remediation of the lead hazard is received. If no lead remediation documentation can be found, please follow lead abatement plan.

The above facility has been inspected and  does  does not conform with the sanitation requirements of the Missouri Department of Health and Senior Services Section for Child Care Regulation.

The inspector has discussed the issues marked by an asterisk (\*) and/or marked by an (X) on this form. I agree to comply with these requirements.
